

# FINALLY, A REAL SOLUTION TO TROUBLESHOOTING SIGNALS ON THE RAIL !

## Introducing the VeriTranz Multi-Frequency Rail Current Detector by Veritech Inc.

A highly sensitive, portable, lightweight device that can detect rail current loss at selectable track & cab signal frequencies, allowing the signal maintainer to quickly find shunts, partial shunts, fouling wire & impedance bond problems, switch component issues, and other areas of current loss using an analog meter and audible alarm

**Veritech Inc.** - 628 Route 10 - Whippany, NJ 07981
